

**APRIL
24-26,
2024**

The 12th Russian International Energy Forum will be held on April 24 through 26 in St. Petersburg.

As usual, one of the leading industrial events will be held in ExpoForum Convention and Exhibition Centre to showcase the newest projects aimed at enhancement of the energy sector.

Every year, the Forum brings together the best industrial experts to discover transformation models for the fuel and energy sector. Decisions made during RIEF are further used as a solid basis for further expansion of equal cooperation in the energy sector and kickoff of mutually beneficial promising projects.

The extensive convention program of RIEF 2024 will comprise conferences, round table discussions, strategic sessions, seminars, and presentations, all of them related to the up-to-date issues and trends of the energy industry and its development scenarios.

The experts will discuss the trends in the area of electric power generation both in Russia and its partner countries, will talk about sustainable development in the fuel and energy sector, digital transformation, safe operation of the fuel and energy complex, as well as tariff-related reforms. Special focus will be on the upgrade of the Russian power plant industry, as it is one of the key sectors to enable stable economic growth.

During the conference arranged by the Youth Innovation Centre of Rosseti Lenenergo, emerging specialists will present their technological and social initiatives associated with the global challenges encountered by energy enterprises.

The key event of the Forum will be the Plenary Session «Russian energy industry development in modern conditions. New internal and external challenges», which is scheduled for April 24.

As part of RIEF 2024, the Power & Electrical Engineering International Specialised Exhibition will take place to present the potential possessed by the Russian and overseas companies as regards to equipment production for generation enterprises, distribution networks, and heat systems.

PLC Technology, Prosoft-Systems, Baltic Energy Company, PEAK-PROGRESS, Matritsa, Radar mms, PromMash Test, Alageum Electric, ETU LETI, Russian-Chinese Business Park, Spetskabel and other companies have already confirmed they will take part in the exhibition.

An essential part of the exhibition arranged during the Russian International Energy Forum will be the collaborative exposition brought by industrial companies from the People's Republic of China. There, they will showcase hi-tech production potential possessed by this Asian state.

In the Business Matchmaking Center, suppliers and customers will have a chance to meet face to face. Such meetings will be participated by senior energy workers and engineers from the top energy companies.

Moreover, the Forum participants will be offered technical tours to the industrial facilities within St. Petersburg.

Along with RIEF 2024, ExpoForum will host the Corrosion Protection International Exhibition and Congress and the Municipal Housing Complex of Russia International Exhibition. Several industrial events held at once in the same place at the same time proved to be a good thing in 2023. It ensured attraction of as many specialists as possible from different sectors of economy.
